

CSCI 1301 - Lab 22

Clément Aubert

April 10, 2018

This lab is a quick review of the exam you just took.

You can download a possible solution for some of the problem you just solved. This code is by no mean the only possible solution, or the “best”: it is a way of solving the solution that I believe is accessible, and clear. The code is poorly commented, but we’ll go over it together.

Have a nice break!
